

Power BI

Microsoft's Business Intelligence tool for creating customized reports and dashboards

Liberali®

Power BI

Power BI is a business intelligence tool from Microsoft that enables the creation of customized reports and dashboards. With Power BI, it's possible to generate reports and dashboards that display numbers, statistics, values, lists, and charts in a simple and intuitive way. Power BI can be used by anyone, team, or company that wants to optimize the construction and visualization of reports based on data. In summary, the integration between Power BI and SAP Business One can be a great advantage for your company, enabling more efficient and agile management. Small, medium, and large companies can benefit from using the tool.

If you are interested in implementing this solution in your company, it is advisable to seek help from qualified experts in SAP Business One and Power BI. Liberali® is a Brazilian multinational technology company, which since 2001 has worked hard to deliver innovative and customized solutions to the agribusiness segment, with total commitment to strategic management and the results of each of its clients.

With operations in 30 countries and business partners on all continents, Liberali® is headquartered in Cuiabá, the central point of the agribusiness granary, a technological hub from where it serves the country's main players. Competently, it serves large rural properties and global agribusiness companies. With Liberali®, you can be sure that your integration will be carried out efficiently and effectively, ensuring real results for your company.
